```
## Dasar Teori
```

isi dengan penjelasan dasar teori disertai referensi jurnal (gunakan kurung siku [] untuk pernyataan yang mengambil referensi dari jurnal).
contoh :

Linked list atau yang disebut juga senarai berantai adalah Salah satu bentuk struktur data yang berisi kumpulan data yang tersusun secara sekuensial, saling bersambungan, dinamis, dan terbatas[1]. Linked list terdiri dari sejumlah node atau simpul yang dihubungkan secara linier dengan bantuan pointer.

penjelasan singkat guided 3

Unguided

1. (isi dengan soal unguided 1)

```
```C++
source code unguided 1
```
```

Output Unguided 1 :

Output 1

![Screenshot Output Unguided 1_1](https://github.com/(username github kalian)/(nama repository github kalian)/blob/main/(path folder menyimpan screenshot output)/(nama file screenshot output).png)

contoh :

![Screenshot Output Unguided 1_1](https://github.com/DhimazHafizh/2311102151_Muhammad-Dhimas-Hafizh-Fathurrahman/blob/main/Pertemuan1_Modul1/Output-Unguided1-1.png)

Output 2

![Screenshot Output Unguided 1_2](https://github.com/(username github kalian)/(nama repository github kalian)/blob/main/(path folder menyimpan screenshot output)/(nama file screenshot output).png)

penjelasan unguided 1

2. (isi dengan soal unguided 2)

```
```C++
source code unguided 2
```
```

Output Unguided 2 :

Output 1

![Screenshot Output Unguided 2_1](https://github.com/(username github kalian)/(nama repository github kalian)/blob/main/(path folder menyimpan screenshot output)/(nama file screenshot output).png)

contoh :

![Screenshot Output Unguided 2_1](https://github.com/DhimazHafizh/2311102151_Muhammad-Dhimas-Hafizh-Fathurrahman/blob/main/Pertemuan1_Modul1/Output-Unguided2-1.png)

Output 2

![Screenshot Output Unguided 2_2](https://github.com/(username github kalian)/(nama repository github kalian)/blob/main/(path folder menyimpan screenshot output)/(nama file screenshot output).png)

penjelasan unguided 2

3. (isi dengan soal unguided 3)

```C++

source code unguided 3

```

Output Unguided 3 :

Output 1

![Screenshot Output Unguided 3_1](https://github.com/(username github kalian)/(nama repository github kalian)/blob/main/(path folder menyimpan screenshot output)/(nama file screenshot output).png)

contoh :

![Screenshot Output Unguided 3_1](https://github.com/DhimazHafizh/2311102151_Muhammad-Dhimas-Hafizh-Fathurrahman/blob/main/Pertemuan1_Modul1/Output-Unguided3-1.png)

Output 2

![Screenshot Output Unguided 3_2](https://github.com/(username github kalian)/(nama repository github kalian)/blob/main/(path folder menyimpan screenshot output)/(nama file screenshot output).png)

penjelasan unguided 3
